

Magnolia ×brooklynensis

'Woodsman'

Výška	4 m
Šírka	2-4m
Koruna	flatened spherical, dark, dense crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green
Kvety	voiletpink, flowers in April, fragrant flowers
Plody	inconspicuous
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Použitie	bulváre a široké ulice, malé záhrady
Tvar	Vetvený

Grows from a shrub into a small tree with a broad, ovoid to flat-topped spherical crown with a height of about 4 m. The flower buds only develop in spring, so they cannot freeze in the winter. Depending on the temperature, the fragrant flowers open around mid-April. They are up to 15 cm in diameter and have an unusual but extremely attractive colour pattern. The outer petals are soft greenish-yellow to light olive green and the inner petals are a soft purplish pink. The inside of the leaves is cream.
