

Magnolia grandiflora

'Galissonière'

Výška	10 - 15 (30) m
Šírka	8-12m
Koruna	conical to spreading pyramidal, dark, dense crown
Kôra a vetvy	bark grey brown and smooth, branches yellow green to brown
Listy	oval to oblong, shiny green, 12 - 20 cm, evergreen
Kvety	creamy-white, Ø 20 - 25 cm, fragrant, July/September, fragrant flowers
Plody	oval, green and velvety haired, 8 - 12 cm
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all, except alkaline soils
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	7b (-14,9 do -12,3 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné vetru
Použitie	bulváre a široké ulice, stromy do nádob
Tvar	Vysokokmeň, Viackmeň
Pôvod	baron Galissonière, France, 1745

Evergreen tree that can attain a height of circa 30 m in the Mediterranean countries. The young twigs turn from yellow green to brown and are softly haired. The leaf buds, which are lanceolate, have the same, soft hairiness. The lanceolate to oval leaf is thick, leathery and strikingly glossy on top. Underneath it is grey to rusty brown and softly haired. In spring and autumn the running-off leaf decomposes badly and has to be cleared away. The strikingly large, saucer-shaped flowers are cream-white with dark-purple stamens. They have a strong, pleasant fragrance. Not many fruits. Several recently introduced cultivars have a fairly reliable hardiness. 'Galissonière' is one of the older cultivars that meets this requirement.
