

Magnolia sieboldii

Výška	4 m
Šírka	3-4m
Koruna	round/spherical, dark, dense crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green
Kvety	white, flowers in June, fragrant flowers
Plody	red, roze
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	stromy do nádob, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

Large, densely branching shrub, growing after many years into a small tree with a round crown. Grows to around 4 m high and wide. The obovate to elliptical leaves are blue-green in colour, especially on young shoots. The large, nodding flowers, about 10 cm in size, only open around late June/early July. They have a delightful, citrus-like fragrance and consist of 9 pure white petals. The pistils are green but the stamens are pink with dark red, contrasting beautifully with the white flowers. A splendid species from China, Korea and Japan. Its shrub-like nature makes it suitable for parks and gardens.
