

Magnolia stellata 'Rosea'

Výška	4-6 m
Šírka	4-6m
Koruna	round/spherical, dark, dense crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green
Kvety	bright pink, light pink, white, flowers in March
Plody	redgreen
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Použitie	stromy do nádob, malé záhrady
Tvar	Vysokokmeň, Viackmeň

Usually a big shrub but sometimes grafted onto a trunk to generate a small tree with a round crown. The slow growth means that it takes many years to develop into a tree of any size. Branches very densely, eventually becoming 3 - 4 m wide. The mid-green leaf is slightly glossy. The teardrop-shaped flower buds have soft hairs. They are visible on the plant before winter. The star-shaped flowers consist of 12 - 20 petals, bright pink on opening and becoming light pink to nearly white. Even young plants bear many flowers. Suitable for use in parks and gardens.
