

Magnolia virginiana

Výška	4 - 5 (8) m
Šírka	4-5m
Koruna	spreading, fanlike to round, half-open crown, capricious growing
Kôra a vetvy	grey-brown bark, young twigs green and hairy
Listy	oval to oblong, green, underside silvery-grey, 10 - 12 cm
Kvety	bowl-shaped, Ø 5 - 7 cm, cream-white, June/July, fragrant, fragrant flowers
Plody	elongated, pink, seeds orange-red
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	fertile, well drained
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	7a (-17,7 do -15,0 °C)
Odolnosť voči vetru	moderate
Stromy pre zvieratá a hmyz	Cenné pre motýle
Použitie	malé záhrady
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	eastern and south-eastern parts of North America
Synonymum	Magnolia glauca

Native to the swamps in the south-east of North America. This Magnolia is an evergreen there. In colder regions and only in warmer winters it is semi-deciduous. Large shrub that can grow into a small, multiple-stemmed tree. The smooth bark is grey brown and when maturing it gets shallow furrows. Young twigs are light green and lightly hairy, later bare. Underneath the shiny green leaf is silvery-grey. It is circa 10 - 12 cm long and 4.5 - 6 cm wide, drops only late in the season. The bowl-shaped flowers have a faint lemon fragrance. They are followed by elongated, erect fruits that are circa 5 cm high and 2 cm wide. The seeds are red. Suitable as a plant for coastal areas. Intolerant to heavy soils. Full sun is only tolerated if the soil is sufficiently moist.
