

Malus ×atrosanguinea

Výška	4-6 m
Šírka	4-6m
Koruna	flatened spherical, half-open crown
Kôra a vetvy	grey
Listy	green
Kvety	pink, flowers in May
Plody	yellow, green, reddisch brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, acid soil, calcareous soil
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good, susceptible to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, priemyselné oblasti, malé záhrady
Tvar	Vysokokmeň, Viackmeň

A natural hybrid between *M. halliana* and *M. toringo*. The crown is flattened spherical, growing broadly outwards with somewhat pendulous branches. Young twigs are purple-red. The deep dark green elliptical leaves are approx. 9 cm long and have a sharply serrated edge. Sometimes the leaf edge is slightly lobed. *M. x atrosanguinea* produces abundant flowers, with scarlet red flower buds and flowers that turn pink when fully opened. The flowers are single and do not fade when finishing flowering. The fruit, with a diameter of approx. 1.2 cm, is relatively small. The fruit is yellowish-green with a brownish-red tint. For parks, public gardens and small gardens. Winter hardiness zone: 5a
