

Malus 'Donald Wyman'

Výška	5-6 m
Šírka	5-6m
Koruna	round/spherical, half-open crown
Kôra a vetvy	grey
Listy	green
Jesenné sfarbenie	Žltá
Kvety	white, flowers in May
Plody	red
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, acid soil, calcareous soil
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good, susceptible to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

Small tree with a round crown up to approx. 6 m tall and wide with grey-brown and smooth bark. The leaves are dark green, turning yellow in autumn. The purple-red flower buds usually only open after leaf development, around mid-May. The white flowers are approx. 4 cm. They are followed by lavish fruit yield. The crab apples are round, approx. 0.9 to 1.3 cm and shiny red. They remain on the tree until February. This Malus was discovered as a spontaneous seedling in Arnold Arboretum, Massachusetts, USA. Although this happened before 1950, the tree was only named in 1970.
