

Malus 'Evereste'

Výška	5 - 6 (8) m
Šírka	4-6m
Koruna	broad pyramidal, half-open crown
Kôra a vetvy	hairless, dark brown
Listy	oval, dark green, 6 - 8 cm
Jesenné sfarbenie	Žltá, Oranžová
Kvety	pure white, single, dark purplish-red in bud, May
Plody	orange-red to red, Ø up to 2.5 cm, remain hanging for a long time
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	nutritious, well drained soil
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	good, susceptible to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	INRA, Angers, France, 1978

Small tree with a pyramidal crown that later broadens out. The branches spread wide, becoming somewhat pendulous later. The twigs and bark are hairless and dark brown. The slightly lobed and dark green leaves remain in the tree for a long time in the autumn, turning to yellowish-orange. The flowers, almost 6 cm in size, grow in bundles of 4 to 8 together. In the bud the flowers are dark purplish-pink but they turn bright white when open. 'Evereste' produces abundant orange-red to red fruits with a diameter of up to 2.5 cm that remain hanging in the tree until far into the winter. Can be used in gardens, parks and public gardens, but only in verges as a street tree. The tree grows best in nutritious, not too dry soil. Free of mildew and scab. Allowing a solitary planted shrub to grow into a multi-trunked tree can produce an attractive effect.
