Slow growing large shrub that grows to become a small sometimes medium-sized tree. The eventual height approx. 6 m. The densely branching crown is pyramidal to wide pyramidal. The branches and bark are grey-brown. The leaves are 3-lobed and the lobes are also lobed and serrated, sometimes giving a 5-lobed appearance. In summer the leaf is dark green turning yellow to deep red in autumn. In June, white flowers open out of white buds. The flowers are 2.5 - 3.5 cm. They are followed by quite small, round to slightly oval fruits. The fruits are red and remain on the tree until early winter.
