

Malus tschonoskii 'Belmonte'

Výška	10 - 12 m
Šírka	6-8m
Koruna	broad pyramidal to round, half-open crown
Kôra a vetvy	young twigs silver grey, hairy; bark grey-brown, smooth
Listy	ovate-elliptical, bluish green, 7-12 cm
Jesenné sfarbenie	Žltá, Oranžová, Fialová
Kvety	white, 3.5 - 4.0 cm mid-late May
Plody	yellow-brown with red dots, 2 - 3 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	nutrient-rich, well-drained soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	good, susceptible to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	priemyselné oblasti
Tvar	Vysokokmeň
Pôvod	NAKB Zeewolde, the Netherlands, 1996

Medium-size tree with a broad pyramidal, eventually almost round crown, to about 12 m. The young twigs are reddish with dense, silver grey hair. The older bark is grey-brown and smooth. Only in older trees do thin plates of bark flake off at the base of the trunk. The leaf is ovate-elliptical, bluish green on top and woolly on the underside. It turns purple to orange in autumn. The white flowers open out of pink tinted buds in around mid-May. These are single and approx. 3.5 - 4 cm. The beautiful fruits are up to 3 cm and yellow-brown with red dots. They remain on the tree into October. In 1996 the NAKB (Netherlands Inspection Service for Horticulture) named a clone that was already present in Dutch nurseries and whose original tree stands in the Arboretum Belmonte at Wageningen. Slightly susceptible to scab.
