

Mespilus germanica 'Macrocarpa'

Výška	4-6 m
Šírka	4-6m
Koruna	flatened spherical, dark, dense crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green
Jesenné sfarbenie	Žltá
Kvety	white, flowers in May
Plody	edible fruits, greenbrown, brown
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, calcareous soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Viackumeň

Mespilus germanica 'Macrocarpa' does not differ much from the species *M. germanica*, but differs from it mainly in that the fruits are larger. '*Macrocarpa*' is a slow-growing tree that eventually reaches 4-6 (8) m in height. The crown is flattened spherical and somewhat irregular in shape. This erratic crown shape gives the tree a somewhat informal character. The old bark is grey. The inverted ovoid to oblong, dark green leaves are hairy. In autumn, the dark green leaves turn dark yellow to orange-yellow. White flowers, up to 5 cm in size, open in May. They are followed by up to 6 cm large edible fruits, called medlars. These are slightly more flattened at the top than in *M. germanica*. '*Macrophylla*' usually produces many fruits. Hardiness zone 5b.
