

## Morus alba 'Macrophylla'

<b>Výška</b>	10 - 15 m
<b>Šírka</b>	7-12m
<b>Koruna</b>	broad pyramidal to practically round, half-open crown
<b>Kôra a vetvy</b>	light grey, bark has regular grooves
<b>Listy</b>	palmately lobed, dark green, 15 - 25 cm
<b>Kvety</b>	unremarkable pendulous catkins, green, May/June
<b>Plody</b>	red, approx. 1.5 - 2 cm, more elongated than those of the species, edible fruits
<b>Tríne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	light, well-drained soil, preferably calcareous
<b>Pôdna vlhkosť</b>	Vhodné do suchých pôd
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	5a (-28,8 do -26,1 °C)
<b>Odolnosť voči vetru</b>	moderate
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6)
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Plody ako potrava pre vtáctvo
<b>Tvar</b>	Vysokokmeň
<b>Pôvod</b>	France, approx. 1815
<b>Synonymum</b>	Morus alba 'Platanifolia'

The crown of this medium-sized tree is broad, open and has tangled branches. It can eventually attain a height of approx. 15 m and a width of approx. 6 - 7 m. The most remarkable difference with the species is the size of the leaves. The leaves are also more regular in shape and less rough. It also shows more vigorous growth than the species. The monoecious tree has unremarkable male and female flowers. The small fruits somewhat resemble raspberries and are red to dark red in colour. They have a bland to slightly sweet taste. This is a tree for a sunny, warm, sheltered site. Saplings are sensitive to frost. Likes chalky soils and grows in poor soil. The familiar M. alba 'Platanifolia' is actually 'Macrophylla'. 'Platanifolia' is therefore a synonym. In the trade 'Macrophylla' is often confused with M. bombycis.
