

Morus nigra

Výška	6 - 10 (15) m
Šírka	9-12m
Koruna	broad, round, half-open crown, capricious growing
Kôra a vetvy	trunk grey and rough, irregular, twigs green
Listy	broad ovoid to heart-shaped, glossy green, 5 - 12 cm
Kvety	unremarkable pendulous catkins, green, May/June
Plody	ovoid, dark red to almost black, 2 - 3 cm, edible fruits
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	humid, well-drained soil, preferably calcareous
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Plody ako potrava pre vtáctvo
Tvar	Vysokokmeň, Ovocný strom vysokokmeň

Large shrub, often growing to become a characteristic tree of medium height. The dense crown consists of a short, knotted and twisted trunk bearing irregularly growing branches. Young twigs change colour from olive-green to brown. The bark is rough and grooved. The broad, ovoid to heart-shaped leaves are irregularly lobed; the leaf edge is serrated and the leaf top tapers to a point. They are rough to the touch because of the hairy underside. This monoecious tree bears unremarkable, green male and female catkins on downy stalks. The relatively large, deep red to almost black fruits are edible. They are fleshy and have a pleasant taste. This is a tree for a sunny, warm, sheltered site. Saplings are sensitive to frost but older plants are winter hardy. Often also used as a trained or shaped tree. Likes chalky soils and grows in poor soil.
