

Nyssa sylvatica 'Autumn Cascades'

Výška	12 m
Šírka	6-8m
Koruna	broad, weeping, half-open crown, capricious growing
Kôra a vetvy	twigs greenish brown, bark dark grey, grooved
Listy	obovate to oval, glossy dark green, 7 - 15 cm
Jesenné sfarbenie	Žltá, Oranžová, Červená
Kvety	inconspicuous, greenish, April/May
Plody	ovoid drupe, dark blue, Ø 0.9 - 1.5 cm
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	prefers loamy soil, not too dry
Pôdna vlhkosť	Vhodné do vlhkých pôd, Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady
Tvar	Vysokokeň, Vetvený, Viackeň

Nice weeping shape of black tupelo whose branches arch gracefully even when young. The glossy dark green leaves are obovate to oval. At 7 to 15 cm they are significantly larger than the species. In autumn they turn deep yellow and orange to scarlet over a period of weeks. The autumn colour partly depends on the soil type in which the tree stands. The root growth is deep making transplantation difficult. *N. sylvatica* grows naturally in marshy sites but this tree can also thrive well in less moist places.
