

Paulownia elongata

Výška	12 m, fast growing
Šírka	10-12m
Koruna	flat-topped spherical, light, open crown, capricious growing
Kôra a vetvy	twigs red-brown, bark grey-brown
Listy	oval with pointed tip, green, 18 - 38 cm long, 8 - 22 cm wide
Kvety	light violet to violet, in erect panicles to approx. 35 cm, May
Plody	ovoid capsule, long-lasting
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, preferably not wet soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	moderate to poor
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Viackmeň
Pôvod	Central China

Large tree with a round, later flat-topped spherical crown to approx. 12 m. Thick year-old branches are reddish brown. The firm extended branches form an arched crown. Older branches are hollow. The leaf is oval with a pointed tip. On the top it is hairless, the underside is covered with star-shaped hair that feels like felt. Just before the leaf emerges, flowers appear in large terminal, branched panicles. The trumpet-shaped flowers are around 7 cm long and light violet to violet. *P. elongata* resembles *P. tomentosa* but its leaves are slightly longer narrower and their tips more tapered. The flowers of *P. elongata* are fractionally bigger and slightly darker. The tree is sensitive to wind and so requires a sheltered site. In Central China, *P. elongata* is a valuable timber resource. In Henan province they are grown in large scale for lumber production.
