

Populus ×canadensis

'Marilandica'

Výška	20-25 m, fast growing
Šírka	15-20m
Koruna	broad conical, half-open crown
Kôra a vetvy	brown, grey
Listy	green
Kvety	green, flowers in April
Plody	greenbrown
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	bad
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné posypovej soli
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň

Populus x canadensis 'Marilandica' A broad spherical to rounded crown develops from an irregular growing, rough trunk. The trunk carries many branches and characteristic heavy branches grow on the windward side. The light-green triangular leaves have an almost straight foot. The tree produces flowers in the form of female catkins. 'Marilandica' is very sensitive to leaf spot disease and fairly sensitive to rust. The tree is little sensitive to canker. This cultivar is suitable for landscape and urban planting but is very sensitive to wind. Winter hardiness zone: 4
