

Prunus incisa 'February Pink'

Výška	3-5 m
Šírka	3-5m
Koruna	broad conical, half-open crown
Kôra a vetvy	brown, grey
Listy	green
Jesenné sfarbenie	Oranžová, Červená
Kvety	light pink, flowers in January
Plody	purple/brown, black, little
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Použitie	malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

Broad upright large shrub to small tree from 3 to 5 m. Initially grows quite vertically, but goes on to develop a broad pyramidal crown. The leaves are strikingly pointed and have a doubly serrated margin. In autumn the green leaf turns orange-red. 'February Pink' blossoms very early. In non-freezing conditions the very light pink flowers already open in January. The early blossoming time means the flowers and flower buds can freeze more easily. Bears few fruits which are purplish black and round. Loves fertile, moist soil and does not tolerate drought well.
