

Prunus incisa 'Mikinori'

Výška	4-6 m
Šírka	1,5-2,5m
Koruna	broad conical, half-open crown
Kôra a vetvy	brown, grey
Listy	green
Jesenné sfarbenie	Červená
Kvety	light pink, flowers in March
Tárne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Cenné pre včely (medonosné)
Použitie	malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

'Mikinori' is a fairly sturdy shrub with a broadly upright, later more rounded crown to over 2.5 m. The leaves are broadly elliptical, about 3.5 cm long and have a pointed tip. The leaf margin of the dark green leaves is coarsely double serrated. The leaves turn deep red in autumn. In the first half of April, the very pale pink flowers open and glow white, with purple-red calyxes standing out. The flower buds are darker pink. The flowers are about 2 cm in diameter and single to semi-double.

'Mikinori' was imported as an unnamed selection from Japan by the Boskoop Nursery Research Station in 1979. The plant flowers richly at a young age and proved to be an addition to the assortment. It was then decided to give the plant a cultivar name. In 1989, 'Mikinori' was introduced by the Research Station. Hardiness zone 6b.
