

## Prunus lusitanica 'Angustifolia'

Výška	5 - 15 m
Šírka	5-10m
Koruna	round, dark, dense crown
Kôra a vetvy	twigs purple to purple-green, bark black-brown, smooth
Listy	narrow oval to narrow elongated-oval, pointed tip, glossy, dark green, 5 - 8 cm, evergreen
Kvety	creamy-white, 1 - 1.5 cm, in terminal and axillary racemes, 15 - 25 cm, June
Plody	dark red to blackish purple, oval
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, provided it is fertile and moist
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	7b (-14,9 do -12,3 °C)
Odolnosť voči vetru	very good
Ostatná odolnosť	Odolné vetru
Použitie	stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti, dvory
Tvar	Vysokokmeň

Grows from a shrub into a small to medium-size tree with a very dense branching and round crown to around 15 m but usually no more than about 10 m tall. The young twigs are conspicuously purple coloured which contrasts nicely with the dark green glossy leaf. The leaves are smaller and distinctly narrower than the species. This is the only way it differs from *P. lusitanica*. Thanks to the firm, leathery leaf, the tree is very wind resistant and can also tolerate sea wind. In 1893 it was described as a natural form (forma) of *P. lusitanica*. Suitable for use in parks and gardens, solitary or in groups. Needs protection against cold, drying wind.
