Prunus padus 'Colorata' forms a sturdy bush to small tree with a half-open rounded crown. Height 6 - 8 m. A noticeable difference with the species is that 'Colorata' produces leaves that emerge reddish-brown. In the summer the leaves are dark green with purple veins. The underside of the leaf is purplish. The flowers are light pink and in bunches. Flowers in late April. Reddish-black fruit (drupes) appear in late summer. Used as a park tree and sometimes as forage for bees. It stands up to wet soil. Winter hardiness zone: 3
