

Pyrus calleryana 'Chanticleer'

Výška	8 - 12 m
Šírka	4 - 6 m
Koruna	narrow conical to ovoid, half-open crown
Kôra a vetvy	old bark is rough and flaky
Listy	oval to broad oval, glossy green, 4 - 10 cm
Jesenné sfarbenie	Zltá, Červená
Kvety	white, in plentiful umbels, April/May
Plody	round, approx. 1 cm Ø, brown with lighter lenticels
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	places little demands
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odolnosť voči vetru	good, also on the coast
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti, malé záhrady
Tvar	Vysokomeř, Vetvený, Viackmeř
Pôvod	E.H. Scanlon & Assoc., Olmstead Falls, OH, USA, 1956
Synonymum	Pyrus calleryana 'Stone Hill'

The most successful cultivar of Pyrus calleryana. Medium-high with a narrow, conical to ovoid crown. Remains significantly narrower than 'Bradford', but broader than 'Capital'. Approx. height 12 m. Old bark is rough, greyish brown, and flaking off in small plates. The healthy, glossy green leaves remain on the tree until late in the autumn and then turn lovely yellow and red tints. It blooms profusely, with white flowers in umbels of 6 to 12 together. The diameter of the flower is approx. 2 cm. Fruit rarely appears after flowering. 'Chanticleer' has a deep root system and anchors itself firmly in the ground. Suitable as a solitary tree and along narrow avenues and streets. Prefers neutral to slightly calcareous soil. Also grows in poor soil. Well resistant to air pollution.
