

Quercus palustris 'Swamp Pygmy'

Výška	6 m
Šírka	5-6m
Koruna	round, half-open crown
Kôra a vetvy	twigs olive green, bark grey, smooth to shallow grooved
Listy	ovate to broad elliptical, roughly lobed, glossy dark green, 10 - 15 cm
Jesenné sfarbenie	Žltá, Červená
Kvety	golden coloured ? catkins, May
Plody	flat-topped spherical, approx. 1 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	preferably fertile, not too limy
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru, Odolné posypovej soli
Použitie	priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	Bömer Tree Nursery, Zundert, the Netherlands, 1986

Slow growing spherical selection with a fairly open growth habit. Depending on the graft height the tree grows to around 6 m. The young twigs are olive green and the older bark and branches are grey. The bark is smooth to shallow grooved. The ovate to broad elliptical leaf is lobed to around halfway along the leaf blade. Like the species, the leaf is somewhat varied, there being shallow-lobed and very deeply lobed leaves. In summer the leaf is glossy green, turning a lovely green-yellow to deep red in autumn. Its compact, irregular, picturesque growth habit makes it very suitable for use in narrow streets, in residential areas and squares. Grows in any soil that is not too limy and can also cope with wet soil. Can tolerate air pollution.
