

# Quercus palustris

## TREEVOLUTION® 'Woodside Splendor'

|                                   |                                                                                           |
|-----------------------------------|-------------------------------------------------------------------------------------------|
| <b>Výška</b>                      | 20 - 25 m                                                                                 |
| <b>Šírka</b>                      | 12-15m                                                                                    |
| <b>Koruna</b>                     | broad conical, later round, half-open crown                                               |
| <b>Kôra a vetvy</b>               | twigs olive green, bark grey, smooth to shallow grooved                                   |
| <b>Listy</b>                      | ovate to oval, roughly lobed, glossy dark green, 7 - 15 cm                                |
| <b>Jesenné sfarbenie</b>          | Červená                                                                                   |
| <b>Kvety</b>                      | golden coloured ? catkins, May                                                            |
| <b>Plody</b>                      | flat-topped spherical, approx. 1 cm                                                       |
| <b>Tŕne</b>                       | Žiadny                                                                                    |
| <b>Jedovatosť</b>                 | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá                                       |
| <b>Typ pôdy</b>                   | any, preferably fertile                                                                   |
| <b>Pôdna vlhkosť</b>              | Vhodné do vlhkých pôd                                                                     |
| <b>Spevnené plochy</b>            | Netoleruje spevnené plochy                                                                |
| <b>Zóna odolnosti</b>             | 5a (-28,8 do -26,1 °C)                                                                    |
| <b>Odolnosť voči vetru</b>        | good                                                                                      |
| <b>Ostatná odolnosť</b>           | Odolné mrazu (WH 1-6), Odolné vetru, Odolné posypovej soli                                |
| <b>Stromy pre zvieratá a hmyz</b> | Odolné mrazu (WH 1-6), Odolné vetru, Odolné posypovej soli, Plody ako potrava pre vtáctvo |
| <b>Použitie</b>                   | bulváre a široké ulice, priemyselné oblasti                                               |
| <b>Tvar</b>                       | Vysokokmeň                                                                                |
| <b>Pôvod</b>                      | Van den Berk Tree Nursery, Sint-Oedenrode, the Netherlands, 2015                          |

A reasonably vigorously growing tree with a straight trunk and beautiful, horizontal branching pattern. The crown has a regular, broad conical shape, later round. The lower branches may sag somewhat after time. The young twigs are olive coloured. The older branches and bark are grey. The bark is smooth to shallow grooved. The leaf is 7 to 15 cm long, sometimes the same width and somewhat variable in shape. It is roughly lobed to around halfway along the leaf blade, with 2 to 4 sharply serrated lobes. It is glossy dark green, turning deep red every autumn. The tree holds on to its foliage in autumn longer than the species. Grows in almost any soil, tolerates air pollution and wet soil.
