

Robinia pseudoacacia 'Tortuosa'

Áno

Výška	10-15 m
Šírka	6-10m
Koruna	oval, half-open crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green, feathered leaf
Kvety	cream-white
Plody	brown, seldom
Tríne	Áno
Jedovatosť	Má jedovaté časti
Typ pôdy	clay soil, loamy soil, sandy soil, nutrient-poor soil, calcareous soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné posypovej soli
Použitie	stromy do nádob, strešné záhrady, priemyselné oblasti
Tvar	Vysokokmeň, Vetvený, Viackmeň

A moderately growing cultivar that is striking because of its twisted branches. Produces a tree 10 - 15 m high with a broad, ovoid to oval crown. Grafted on a high stem, but sometimes also on a low stem to produce a somewhat shrub-like manner of growth. A multi-trunked tree then develops later. The thorny branches grow in remarkable curves; young shoots often grow like cork-screws. The more or less hanging leaves are also somewhat twisted. Flowers appear only occasionally, only on old trees. Sensitive to strong winds. It is a valuable park tree that is used particularly for its winter silhouette. Winter hardiness zone: 5a With its tortuous and spirally twisted branches Robinia pseudoacacia 'Tortuosa' provides an exceptionally characteristic winter silhouette at a later age.
