

Salix ×sepulcralis 'Chrysocoma'

Výška	20(25) m
Šírka	15-20m
Koruna	broad weeping, half-open crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green, yellowgreen
Jesenné sfarbenie	Žltá
Kvety	yellow, flowers in April
Plody	fruitless cultivar
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Pôdna vlhkosť	Vhodné do vlhkých pôd, Odolné voči krátkodobému zaplaveniu, Odolné voči dlhodobému zaplaveniu
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre včely (medonosné)
Tvar	Vysokokmeň, Viackmeň
Synonymum	Salix alba 'Tristis'

Salix ×sepulcralis 'Chrysocoma', or weeping willow, reaches a height of 20-25 metres and is notable for its broad weeping, jagged crown. The bark is brown to grey and changes as the tree ages. The leaves, initially yellow-green, turn bright yellow in autumn. Yellow flowers appear in April. This willow tolerates wet soil and can withstand flooding, but does not tolerate paving. The tree is hardy to -28.8 °C and wind resistant. As a gestation tree, it provides food for bees, making it useful for biodiversity. Suitable for both tall-stemmed and multi-stemmed forms, this weeping willow is ideal for parks and large gardens.
