

Salix alba 'Belders'

Výška	approx. 25 m, fast growing
Šírka	14-18m
Koruna	ovoid, half-open crown
Kôra a vetvy	yellowish brown to grey, deeply grooved, twigs thin, greenish-brown
Listy	lanceolate, bright green, 6 - 12 cm
Kvety	yellow ? catkins, approx. 5 cm long, April
Plody	catkins, approx. 8 cm long
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	moist and wet, preferably calcareous
Pôdna vlhkosť	Vhodné do vlhkých pôd, Odolné voči krátkodobému zaplaveniu, Odolné voči dlhodobému zaplaveniu
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Viackmeň
Pôvod	Boskant, Sint-Oedenrode, The Netherlands, 1967

A male cultivar of *S. alba* with a nice straight to slightly bent trunk and a narrow oval to ovoid crown. Height to approx. 25 m. Often used in landscaping as a pollard willow and then remains significantly lower. The yellowish brown to grey trunk has grooves and is somewhat corky. Young twigs are yellowish brown and very bendable; they are often used for wickerwork and basketwork. The lanceolate leaves are dark green and slightly shiny on top. The leaves are bluish green on the underside. Both sides are slightly hairy with silvery hairs. The yellow catkins appear at the same time as the leaves. Roots grow close to the surface, with very many root-hairs. It grows in moist places and can stand temporary submersion, but also thrives in dryer places. Of the cultivars of *S. alba*, 'Belders' is the most resistant to watermark disease.
