

## Sorbus aucuparia 'Rossica Major'

|                            |                                                                      |
|----------------------------|----------------------------------------------------------------------|
| Výška                      | 8-10 m                                                               |
| Šírka                      | 6-8m                                                                 |
| Koruna                     | ovoid / egg-shaped, half-open crown                                  |
| Kôra a vetvy               | grey                                                                 |
| Listy                      | green, feathered leaf                                                |
| Jesenné sfarbenie          | Oranžová, Červená                                                    |
| Kvety                      | white, flowers in May                                                |
| Plody                      | orange, red                                                          |
| Tríne                      | Žiadny                                                               |
| Jedovatosť                 | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá                  |
| Typ pôdy                   | loamy soil, sandy soil, acid soil, calcareous soil                   |
| Pôdna vlhkosť              | Vhodné do suchých pôd                                                |
| Spevnené plochy            | Netoleruje spevnené plochy                                           |
| Zóna odolnosti             | 4 (-34,4 do -28,9 °C)                                                |
| Odolnosť voči vetru        | good                                                                 |
| Ostatná odolnosť           | Odolné mrazu (WH 1–6), Odolné vetru                                  |
| Stromy pre zvieratá a hmyz | Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo   |
| Použitie                   | bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady |
| Tvar                       | Vysokokmeň                                                           |

Sorbus aucuparia 'Rossica Major' is a vigorous tree with branches that grow vertically and an ovoid crown. Height 8 - 10 m. The leaves are a remarkable deep green and the leaf stem is red and bears soft hairs. The separate leaves can be 8 cm long and have variable autumnal colours. Large umbels of relatively large, often more than 1.5 cm in diameter, deep red fruits appear in August and September. Winter hardiness zone: 4
