

## Sorbus commixta

<b>Výška</b>	8 - 10 m
<b>Šírka</b>	6-8m
<b>Koruna</b>	broad oval, half-open crown
<b>Kôra a vetvy</b>	silver-grey to greyish-brown, smooth, later with shallow grooves
<b>Listy</b>	imparipinnate, 15 - 20 cm, leaflets ovoid to oval, dark green, feathered leaf
<b>Jesenné sfarbenie</b>	Žltá, Červená
<b>Kvety</b>	white, in umbels of 9 - 15 cm in diameter, May/June/July
<b>Plody</b>	glossy, orange-red to brownish-red, Ø 0.7 - 0.9 cm
<b>Trne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	light clay and sandy soils, withstands dry conditions
<b>Pôdna vlhkosť</b>	Vhodné do suchých pôd
<b>Spevnené plochy</b>	Toleruje čiastočné spevnenie
<b>Zóna odolnosti</b>	6a (-23,3 do -20,6 °C)
<b>Odolnosť voči vetru</b>	good
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné vetru
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
<b>Použitie</b>	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady
<b>Tvar</b>	Vysokokmeň, Viackmeň
<b>Pôvod</b>	Northeast Asia, Japan

This small East-Asian tree closely resembles *S. aucuparia* and attains a height of 8 - 10 m. The crown is ascending when the tree is still young but it later becomes broad and oval. The smooth bark is silver-grey to greyish-brown and bears brown lenticels. Young twigs are olive-green and also carry remarkable lenticels. *S. commixta* has imparipinnate leaves consisting of 5 to 6 (seldom 7) pairs of leaves. The separate leaflets are elongated and serrated and their colour is a glossy dark green, bluish-green on the underside. In the autumn it turns from yellow and red to deep coral-red. The flowers emerge late in the spring and are followed by glossy orange-red to brownish-red fruits with a diameter of approx. 0.8 cm. They stay on the tree until late October.
