

Sorbus intermedia 'Brouwers'

Výška	10 - 12 m
Šírka	4-6m
Koruna	ovoid to spherical, dark, dense crown
Kôra a vetvy	bark smooth, blackish-grey, later grooved
Listy	oval to ovoid, lobed, dark green, 6 - 10 cm
Jesenné sfarbenie	Žltá, Oranžová
Kvety	creamy-white, in umbels of approx. 11 cm Ø, May, fragrant flowers
Plody	ovoid to round, orange-red, fruits up to 1.2 cm Ø
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	makes few demands, grows best on calcareous soils
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, stromy do nádob, strešné záhrady, pobrežné zóny
Tvar	Vysokokmeň, Viackmeň
Pôvod	Brouwers Boomkwekerijen B.V., Groenekan, Netherlands, 1956

The 'Brouwers' cultivar has a better ascending top than the species and thus grows more uniformly. It is a slow grower with dense branches. The blackish-grey trunk remains smooth for a long time but is later grooved. Young twigs are greyish-brown to olive-brown, hairy at first but very quickly become bare. The leaves are lobed with 5 to 9 lobes on each side. On the upper side they are dark green and slightly glossy while the underside is white and felt-like; in the autumn they turn yellow to orange-yellow. Sometimes the autumn coloration fails to appear. The creamy white flowers give off a scent that is typical of the tree. After flowering the tree produces orange-red ovoid to round fruits in small umbels. These remain on the tree until October. It is a wind-resistant tree that stands up well to dry conditions. Can be used in coastal regions. 'Brouwers' bears considerably less fruit than the species. Resistant to fire blight.
