

## Sorbus latifolia 'Henk Vink'

Výška	10-12 m
Šírka	6-10m
Koruna	narrow conical, half-open crown
Kôra a vetvy	grey
Listy	green, white
Kvety	cream-white, flowers in May
Plody	yellow, orange, red, brown
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, nutrient-poor soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, úzke ulice, priemyselné oblasti
Tvar	Vysokokmeň

A good Sorbus latifolia selection with a faster growth rate and a narrow pyramidal crown. Height up to 12 m. The trunk is grey and rougher than that of the species; the young twigs are reddish-brown with white hairs. The broad, ovoid to almost round, sturdy, leathery leaves are glossy green and, on the underside, yellowish-green with felt-like hairs. The young emerging leaves also bear white felt-like hairs. The leaves are slightly more broadly serrated than those of the species. In late May the umbels of creamy white flowers appear. In the late summer numerous brownish-red to orange-yellow berries emerge. Fairly resistant to bacterial fire blight. Very resistant to wind. Winter hardiness zone: 5a
