

Syringa pekinensis

Výška	3 - 6 m
Šírka	3-6m
Koruna	flat-topped spherical, half-open crown
Kôra a vetvy	twigs brown, bark brown, flaking
Listy	oval to elongated, mid-green, 3 - 9 cm
Kvety	in dense panicles, 10 - 15 cm, yellow-white, June, fragrant flowers
Plody	dry, woody capsule, brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, provided well-drained, tolerates limy soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	fairly
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady, malé záhrady
Tvar	Vysokokmeň
Pôvod	Northern China

Large shrub to small tree with an elegant, flat-topped, spherical to fan-shaped crown. In culture, 3 to 6 m tall but in the wild, trees of more than 10 m have been found. The thin, young twigs are reddish brown. Older bark is brown and initially very smooth. Later this exfoliates like the bark on *Prunus serrula*. The oval to elongated oval leaves are green on top and grey-green underneath. In June dense panicles of yellow-white flowers appear. The stamens are about twice as long as the corolla tube and clearly protrude from the flowers. The flowers have quite a strong fragrance reminiscent of privet. The flowers are followed by dark brown, woody capsules. This lilac prefers a warm, sunny site and grows in any soil provided it is not too wet. Also tolerates lime.
