

Syringa reticulata 'Ivory Silk'

Výška	10 m
Šírka	4-6m
Koruna	oval, half-open crown
Kôra a vetvy	twigs brown, flaking, bark dark grey-brown with broad horizontal lenticels
Listy	broad oval, dark green, 5 - 14 cm
Kvety	in dense panicles to approx. 30 cm, yellow-white, June/July, fragrant flowers
Plody	dry, woody capsule, brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, provided well-drained, tolerates limy soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	fairly to good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre včely (medonosné)
Použitie	stromy do nádob, strešné záhrady, malé záhrady
Tvar	Vysokokmeň
Pôvod	Leonard K. Slater, Agincourt, Ontario, Canada, 1973

Medium-size tree with an oval crown to approx. 10 m tall and 8 m wide. The young twigs are brown to reddish brown and flaking after several years like the bark of *Prunus serrula*. Old bark is dark grey-brown and typically covered with horizontal lenticels. The broad oval leaves are dark green. Around late June to mid-July large dense panicles of yellow-white flowers appear. The flowers have a strong fragrance reminiscent of privet. The flowers are followed by dark brown, woody capsules. Selected by Leonard Slater from a group of seedlings at Sheridan Nurseries in Canada and differs from the species by its distinctly upright growth pattern and eventually narrower crown. This lilac prefers a warm, sunny site and grows in any soil provided it is not too wet. Also tolerates lime.
