Syringa vulgaris 'Monique Lemoine'

Výška	4-6 m
Šírka	2-3m
Koruna	vase-shaped, half-open crown
Kôra a vetvy	flaking, brown, grey
Listy	green
Kvety	snow-white, flowers in May, fragrant flowers
Plody	brown
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady, malé záhrady
Tvar	Viackmeň

'Monique Lemoine' is a large shrub to small tree with a broad oval crown of 3-4 m reached. The young twigs are green and the old bark is grey-brown, flaking off slightly in small patches later in life. The broadly ovoid leaves are 9-12 cm long and are light green to mid-green in colour. The flower panicles are large and quite broad. They are about 15-22 cm long and 9-12 cm wide. The individual flowers are remarkably large, reaching 2.5-3 cm in diameter. The flower buds are pale greenish-yellow. The opened flowers are pure white and fully filled with narrow corolla lobes, giving the blooms a finer texture. They have a strong and pleasant fragrance. The flowers open in the first half of May. 'Monique Lemoine' flowers very richly, with up to four flower panicles per branch. This enhances the impression of a full, richly flowering plant.

Syringa vulgaris grows in any nutrient-rich and humus-rich soil. The plant prefers neutral to calcareous soil. 'Monique Lemoine' is very similar to 'Mme Lemoine', but differs from it in that the tree grows more vigorous and the flowers are slightly less double. Like the other cultivars of S. vulgaris, 'Monique Lemoine' is very suitable for use in parks and gardens. 'Monique Lemoine' was introduced by Victor Lemoine & Fils in Nancy, France, in 1839. Hardiness zone 4.
