

## Tetradium daniellii

<b>Výška</b>	10 - 12 m, fast growing
<b>Šírka</b>	8-10m
<b>Koruna</b>	broad fan-shaped, half-open crown, capricious growing
<b>Kôra a vetvy</b>	grey, smooth bark, twigs olive green, velvety grey hair
<b>Listy</b>	imparipinnate, with 5 - 9 leaf segments, dark green, 20 - 35 cm, feathered leaf
<b>Kvety</b>	small white flowers in broad pyramidal plumes, June, fragrant flowers
<b>Plody</b>	reddish, Ø 0.8 - 1 cm.
<b>Tárne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	well-permeable, rich in humus, not too wet
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	7a (-17,7 do -15,0 °C)
<b>Odolnosť voči vetru</b>	moderate
<b>Stromy pre zvieratá a hmyz</b>	Cenné pre motýle
<b>Použitie</b>	stromy do nádob
<b>Tvar</b>	Vysokokmeň, Viackmeň
<b>Pôvod</b>	Northern China, Korea
<b>Synonymum</b>	Euodia daniellii, Euodia velutina

Fast-growing solitary tree with a semi-open, broad, fan-shaped crown on a short trunk. The smooth bark is dark grey and has lenticels. Twigs are olive green, with velvety grey hair, and have small, whitish lenticels. They turn greyish brown the second year. The imparipinnate leaves consist of 5 - 9 opposed leaf segments and are 20 – 35 cm long. Each leaflet is ovoid and tapers to a point, 4 - 9 cm long with a short stem. The upper side of the leaf is dark green while the underside is light green. Aromatic white flowers, each 0.3 – 0.5 cm, grow in broad, pyramidal plumes of 10 – 15 cm. Reddish fruit appears after flowering. For a long time, this tree was known as Euodia, a synonym still commonly used.
