

Tilia heterophylla 'Prestige'

Výška	12 - 15 m
Šírka	5-6m
Koruna	narrow ovoid, half-open crown
Kôra a vetvy	twigs red, bark dark brown, grooved
Listy	broad ovate with broad retuse base and long pointed tip, glossy dark green, 8 - 13 cm
Kvety	in corymbs 10 - 20 together, cream-coloured, July, fragrant flowers
Plody	ovate, Ø circa 0.8 cm, brown, felt-like hairs
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, provided well-drained
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	very good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Viackmeň
Pôvod	Willet N. Wandell, Urbana, IL, USA, 1976
Synonymum	Tilia heterophylla 'Continental Appeal'

Large tree with a distinctly more slender crown than other linden species and cultivars. The tree grows to approx. 15 m tall and 6 m wide. The young twigs are red, mature bark is dark brown and grooved. The gracefully shaped, broad ovate leaves have a retuse base and a long pointed tip. Its margin is finely and sharply serrated. The top of the leaf is glossy dark green, the underside white felt-like and light brown on young leaves. In July the fragrant, cream-coloured flowers, 10 - 20 together, appear in approx. 8 cm long corymbs. They are followed by brown, felt-like hairy ovate fruits. This cultivar was first distributed in the USA under the synonym, 'Continental Appeal'. A good avenue tree that can be used mainly in places where other lindens are too wide.
