

Tilia mongolica 'Buda'

Výška	8-10 m
Šírka	7-10m
Koruna	broad ovoid, dark, dense crown
Kôra a vetvy	brown, grey
Listy	green
Jesenné sfarbenie	Žltá
Kvety	cream-white, flowers in June
Plody	green, grey
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	bulváre a široké ulice, malé záhrady
Tvar	Vysokokmeň, Viackmeň

'Buda' is a medium-sized tree with a dense crown to about 12 m high, slightly higher under favourable conditions. The tree has a regularly shaped crown. The young twigs, especially on the sunny side, are red-brown. The old bark is grey-brown and remains smooth for a long time. Only later in life is the bark grooved. Too tips of the branches and twigs hang down slightly, gracefully distinguishing 'Buda' from the species *T. mongolica*. The leaves are quite small and heart-shaped to triangular. Unlike the species *T. mongolica*, whose leaves are usually lobed, the leaf edges of 'Buda' are serrated. The shiny dark green leaves turn yellow in autumn.
