

# Tilia tomentosa **STERLING SILVER** (**'Wandell'**)

|                                   |                                                                                              |
|-----------------------------------|----------------------------------------------------------------------------------------------|
| <b>Výška</b>                      | 12-15 m                                                                                      |
| <b>Koruna</b>                     | broad conical, half-open crown                                                               |
| <b>Kôra a vetvy</b>               | grey                                                                                         |
| <b>Listy</b>                      | green, greygreen                                                                             |
| <b>Jesenné sfarbenie</b>          | Žltá                                                                                         |
| <b>Kvety</b>                      | yellow, flowers in July, fragrant flowers                                                    |
| <b>Plody</b>                      | green, grey                                                                                  |
| <b>Tŕne</b>                       | Žiadny                                                                                       |
| <b>Jedovatosť</b>                 | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá                                          |
| <b>Typ pôdy</b>                   | clay soil, loamy soil, sandy soil, peaty soil                                                |
| <b>Pôdna vlhkosť</b>              | Vhodné do suchých pôd                                                                        |
| <b>Spevnené plochy</b>            | Toleruje spevnenie                                                                           |
| <b>Zóna odolnosti</b>             | 6a (-23,3 do -20,6 °C)                                                                       |
| <b>Odolnosť voči vetru</b>        | tolerates (sea) wind                                                                         |
| <b>Ostatná odolnosť</b>           | Odolné mrazu (WH 1-6)                                                                        |
| <b>Stromy pre zvieratá a hmyz</b> | Odolné mrazu (WH 1-6), Cenné pre motýle                                                      |
| <b>Použitie</b>                   | bulváre a široké ulice, stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti |
| <b>Tvar</b>                       | Vysokokmeň                                                                                   |

An American cultivar that grows more loosely and smaller than the species does. Height 12 - 15 m, width up to approx. 10 m. 'Wandell' has a good straight main branch on which upwards-slanting branches grow, thus forming a completely symmetrical crown. The smooth trunk is dark grey and the young twigs are greenish grey and felt-like. The leaves are more or less round, dark matt green with a remarkably thick white felt underside. The autumn colour is light yellow. In July, aromatic flowers appear. Its uniform manner of growth makes 'Wandell' very suitable for wide avenues, verges and parks. Fairly unsusceptible to aphids. Winter hardiness zone: 6a
