A Polish cultivar with a fairly narrow, pyramidal crown. The tree has a good, straight main branch on which upwards-slanting branches grow. Height 20 - 25 m, width approx. 8 - 10 m. The smooth trunk is dark grey; young twigs are greenish grey and felt-like. The leaves are more or less round, dark matt green with a remarkably thick white felty underside. In the autumn they turn light yellow and stay on the tree for a long time. In July, pendulous umbels of strongly aromatic flowers appear. 'Varsaviensis' is a good avenue and street tree thanks to its uniform, relatively narrow manner of growth. Fairly unsusceptible to aphids. Winter hardiness zone: 6a
