

Toona sinensis 'Flamingo'

Výška	10 - 15 m
Šírka	7-10m
Koruna	oval to broad oval, half-open crown
Kôra a vetvy	twigs copper-coloured and hairy, bark brown-grey with longitudinal splits
Listy	paripinnate, 40 - 60 cm, glossy light green, young leaf pink, feathered leaf
Jesenné sfarbenie	Žltá
Kvety	white, in pendent panicles to 50 cm long, June/July
Plody	woody capsule with 5 splits containing winged seeds, Ø 2 - 3 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	good, nutrient-rich soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	fairly
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Tvar	Vysokokmeň, Viackmeň
Pôvod	Australia, pre-1930

Particularly striking medium-size tree growing to 10 to 15 m. Initially the tree grows slenderly upwards and has a columnar crown. At a later stage the crown spreads. The young twigs are copper-coloured and hairy. The mature bark is grey-brown with longitudinal splits later. When damaged, the bark, branches and leaves smell unpleasant. The large, paripinnate leaf consists of 20 - 26 leaf segments. These are the same shape as the species. On emerging, they are intense orange-pink, turning greenish-yellow and eventually glossy, light green. In autumn the leaf turns yellow. The small, equally unpleasant smelling flowers appear in large panicles. After the blossom, woody capsules form containing winged seeds. The flowers and fruits only appear in hot summers. A special park tree or solitary.
