

Ulmus ACCOLADE ('Morton')

Šírka	15-18m
Jesenné sfarbenie	Žltá
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Pôdna vlhkosť	Vhodné do suchých pôd, Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Synonymum	Ulmus davidiana 'Morton', Ulmus japonica 'Morton'

Large tree up to 20 m with a vase-shaped crown that later becomes broadly vase-shaped. The brown-grey bark is slightly grooved. At 3.5 to 6 cm long, the leaf is relatively small. It is inverted ovoid and glossy dark green. In autumn, it turns golden yellow to brownish yellow. The tree originated from a cross between *Ulmus japonica*, formerly known as *Ulmus davidiana* var. *japonica*, and *Ulmus wilsoniana*. In 1924, the Morton Arboretum obtained seed from the famous Arnold Arboretum in Massachusetts. This gave rise to *Ulmus* 'Morton'. For a long time, nothing was done with the tree, until it proved to be resistant to Dutch elm disease. With assisted pruning, it is also suitable for use in streets.
