

Magnolia grandiflora ALTA ('TMGH')

Šírka	2-3m
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	7a (-17,7 do -15,0 °C)
Použitie	bulváre a široké ulice, stromy do nádob
Tvar	Vetvený

Whereas the species *M. grandiflora* is somewhat irregular and forms a broad pyramidal to round crown, ALTA, on the contrary, grows with a dense, broad columnar to narrow oval crown. This will create, without too much corrective pruning, a narrow avenue tree. It is a good-growing tree that grows about 5 m tall. The evergreen, oval, leaves are a glossy dark green with a light brown hairy underside. The thick, leathery leaves are highly resistant to wind. Large, white flowers appear throughout the summer, with a lovely fragrance. The flowers stand out well against the dark green background formed by the leaves.

Grows in any type of soil, provided it is sufficiently permeable and deeply rooted. Excellent tree for architectural applications and places where a Mediterranean atmosphere should be created. Hardiness zone 7a.
