

Cryptomeria japonica 'Globosa Nana'

Výška	1-2 m, fast growing
Šírka	1-2m
Koruna	round/spherical, dark, dense crown
Kôra a vetvy	grey
Listy	green/yellow, evergreen
Kvety	unremarkable, flowers in January
Plody	grey, brown
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Použitie	malé záhrady, dvory
Tvar	Vysokokmeň, Vzorový ihličnan

This slow-growing cultivar forms an almost spherical large shrub to about 2 m high. 'Globosa Nana' is very regularly branched with short twigs that branch strongly at the tips, the tips of which are typically curved. The scaly needles are 5 - 8 mm long and yellow-green. In winter, the foliage turns blue-green. 'Globosa Nana' has a very regular plant form and grows fine. It is also well hardy and can therefore be widely used in gardens and parks.

The name 'Globosa Nana' was given in the Netherlands in 1923, but the plant was probably imported from Japan and had therefore been in cultivation there longer. Hardiness zone: 6a
