

## Ginkgo biloba 'Tremonia'

|                            |                                                                                           |
|----------------------------|-------------------------------------------------------------------------------------------|
| <b>Výška</b>               | 10 - 12 m                                                                                 |
| <b>Šírka</b>               | 3-4m                                                                                      |
| <b>Koruna</b>              | columnar to oval, light, open crown, capricious growing                                   |
| <b>Kôra a vetvy</b>        | twigs light brown, bark grey-brown, later deeply grooved                                  |
| <b>Listy</b>               | in clusters of 3 - 5, fan-shaped, 7 - 10 cm long, green                                   |
| <b>Jesenné sfarbenie</b>   | Žltá                                                                                      |
| <b>Kvety</b>               | green, inconspicuous, April/May                                                           |
| <b>Plody</b>               | none; male cultivar, fruitless cultivar                                                   |
| <b>Tríne</b>               | Žiadny                                                                                    |
| <b>Jedovatosť</b>          | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá                                       |
| <b>Typ pôdy</b>            | any                                                                                       |
| <b>Spevnené plochy</b>     | Toleruje spevnenie                                                                        |
| <b>Zóna odolnosti</b>      | 5a (-28,8 do -26,1 °C)                                                                    |
| <b>Odolnosť voči vetru</b> | fairly to good                                                                            |
| <b>Ostatná odolnosť</b>    | Odolné mrazu (WH 1-6), Odolné vetru                                                       |
| <b>Použitie</b>            | bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, priemyselné oblasti |
| <b>Tvar</b>                | Vysokokmeň, Vetvený, Viackmeň, Vyvetvený ihličnan, Vzorový ihličnan                       |
| <b>Pôvod</b>               | Botanischer Garten Rombergpark, Dortmund, Germany, 1970                                   |

A column-shaped selection with a remarkably straight main stem and open branching. 'Tremonia' is slow-growing, especially when young, and remains very narrow, even when mature. Height 10 - 12 m. Width to approx. 5 m. The fan-shaped leaves and flower buds are on short shoots. The leaves grow in bundles of 3 - 5 together and have an incised top. Adding decorative value is the golden yellow colour this tree turns in autumn. 'Tremonia' is a male type that is excellently suited as a street tree, thanks to its lack of fruit. Its narrow crown renders it suitable for small gardens, as well. Requires a site with ample light. Winter hardiness zone: 5a
