

## Taxus baccata 'Fastigiata'

Výška	5 - 10 m
Šírka	1-3m
Koruna	column-shaped, later broader, dark, dense crown
Kôra a vetvy	bark thin and brownish red, flaking, deep grooves
Listy	needles, arranged in spiral shape, dark green, 1.5 -3 cm, evergreen
Kvety	unremarkable, green, female clone
Plody	brownish black seeds, covered 4/5 with a fleshy, red case
Trne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	sandy, loamy soil, well-permeable
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, priemyselné oblasti, dvory
Tvar	Vzorový ihličnan
Pôvod	Ireland, 1780

A column-shaped growing Taxus that remains narrow when young but later grows broader. The branches grow straight upwards at first, later bending somewhat. Short, squat lateral branches grow on the vertical branches. It is a slow grower that develops a dense, closed crown. Height 5 - 10 m, width 1.5 – 2.5 (5) m. Young twigs are green. The needles are arranged in a spiral and are very dark green. This female clone does not have very remarkable flowers. The fruit, on the other hand, is. Seeds are covered 4/5 by an oval, fleshy, red case that is 0.6 – 0.7 cm long. 'Fastigiata' bears profuse fruit. The cultivar 'Fastigiata Robusta' remains significantly narrower and has darker green needles. 'Fastigiata Aurea' takes on a column shape with yellowish green needles.
