

Taxus baccata 'Fastigiata' Aureomarginata'

| | |
|-----------------------------------|-----------------------------------------------------------------------------|
| Výška | 4-6 m |
| Šírka | 1-2m |
| Koruna | columnar, dark, dense crown |
| Kôra a vetvy | flaking, reddish brown |
| Listy | variegated, off white/ green, evergreen |
| Kvety | yellow, flowers in April |
| Plody | fruitless cultivar |
| Tŕne | Žiadny |
| Jedovatosť | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá |
| Typ pôdy | clay soil, loamy soil, sandy soil, acid soil, calcareous soil |
| Spevnené plochy | Netoleruje spevnené plochy |
| Zóna odolnosti | 6b (-20,5 do -17,8 °C) |
| Odolnosť voči vetru | good |
| Ostatná odolnosť | Odolné mrazu (WH 1-6), Odolné vetru |
| Stromy pre zvieratá a hmyz | Odolné mrazu (WH 1-6), Odolné vetru, Plody ako potrava pre vtáctvo |
| Použitie | stromy do nádob, strešné záhrady, priemyselné oblasti, malé záhrady, dvory |
| Tvar | Vzorový ihličnan |
| Synonymum | Taxus baccata 'Fastigiata Aurea', Taxus baccata 'Fastigiata Mediovariegata' |

A small tree that is narrow columnar at first, but spreads out later. At around 3 m it remains significantly smaller than the green *T. baccata* 'Fastigiata'. Its compact growth means it produces a very dense crown. The branches grow straight up. The young twigs are green-yellow, the old bark is brown-red and flaking. The yellow to creamy white variegated needles are arranged in a spiral and around 3 cm long and 0.3 cm wide. The blossom is male so no fruit is produced. Suitable for parks, cemeteries and gardens. It is also found under the synonyms 'Fastigiata Aurea' and 'Fastigiata Mediovariegata'.
