

Acer xfreemanii AUTUMN BLAZE ('Jeffersred')

Výška	12 - 15 m, fast growing
Šírka	9-12m
Koruna	broad pyramidal to oval, dark, dense crown
Kôra a vetvy	smooth, grey-brown
Listy	5 lobes, thick, shiny bright green with red veins and leaf stem, 8-10 cm
Jesenné sfarbenie	Oranžová, Červená
Kvety	white, flowers in April
Plody	single seeds, winged, always in pairs, few or entirely absent, fruitless cultivar
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, but not too limy
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Pôvod	Jeffers Nursery, Fostoria, OH, USA, 1980
Synonymum	Acer x freemanii 'Autumn Blaze'

Medium-size tree up to approx. 15 m height with regular, broad, pyramidal crown. The bright green, 5-lobed leaves are fairly small and less deeply dissected than with *A. saccharinum*. They have red stems and a greyish underside. In autumn it turns deep orange-red to intense red. The autumn colour persists quite a long time before the leaf falls. Like all *A. x freemanii*, 'Jeffersred' flourishes on most soils as long as they are not too limy. Although the plant is female, fruits rarely form. The tree was discovered at the end of the 1960s by Glenn Jeffers of the eponymous nursery, but only named in 1980.
