

Acer campestre 'Elsrijk'

Výška	circa 12 m
Šírka	7-8m
Koruna	closely oval to widely conical shaped, dark, dense crown
Kôra a vetvy	grey bark
Listy	3/5 lobes, dark green, 4 - 6 cm
Jesenné sfarbenie	Žltá
Kvety	small, terminal corymbs, yellow green, May
Plody	single-seed, winged nutlets, always paired
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all, except dry infertile sandy soil
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	very good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli, Cenné pre motýle
Použitie	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	C.P. Broerse, municipal nursery Amstelveen (NL), 1953

The cultivar 'Elsrijk' strongly resembles the species morphologically. As a rule the tree is slightly less tall and the leaves are a little smaller. The most striking feature is the very dense and closed crown. Therefore 'Elsrijk' is very suitable for narrow streets. The fact that the plant can withstand hard surfaces contributes positively. The plant forms a strongly branching root ball with very many hair roots. 'Elsrijk' is hardly sensitive to mildew, also a characteristic that has contributed to the fact that this tree became part of the standard assortment of avenue trees in a relatively short time. In 1953 'Elsrijk' was selected from a population of 12-year-old trees. Even then the plant caught the attention because of its narrow crown.
