

## Acer davidii

<b>Výška</b>	8 - 12 (15) m
<b>Šírka</b>	7-11m
<b>Koruna</b>	oval to round, light, open crown, capricious growing
<b>Kôra a vetvy</b>	twigs purple with greyish white longitudinal stripes
<b>Listy</b>	oval to elongated, dark green, 8 - 16 cm
<b>Jesenné sfarbenie</b>	Žltá, Oranžová, Červená
<b>Kvety</b>	pendent corymb-shaped racemes, light yellow, May
<b>Plody</b>	single-seeded, single-winged, light green
<b>Térne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	all soils
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	6a (-23,3 do -20,6 °C)
<b>Odolnosť voči vetru</b>	good
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné vetru
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
<b>Použitie</b>	stromy do nádob, strešné záhrady
<b>Tvar</b>	Vysokokmeň, Viackmeň
<b>Pôvod</b>	Central China

Because of its conspicuously striped bark *A. davidii*, together with *A. capillipes* and *A. rufrinerve*, belong to the so-called “Snake Bark maples”. The young twigs are dark purple- red and retain this colour during winter. The older twigs and stem have conspicuously greyish white longitudinal stripes. The leaves are less prominently lobed and unlike *A. capillipes* the leaves of *A. davidii* are hairy on the under surface along the veins. The leaf of young plants is ternate, those of older trees do not have lobes. The flowers are unisexual, male and female flowers appear on one plant. The plant has a strongly branched and compact root system. The application of the plant is restricted to parks and larger gardens because it is less suitable for use in hard surfaces. This decorative tree will also stand out well in green borders.
