

## Acer davidii subsp. grosseri

<b>Výška</b>	circa 10 m
<b>Šírka</b>	6-8m
<b>Koruna</b>	oval to round, light, open crown, capricious growing
<b>Kôra a vetvy</b>	twigs purple with grey-white longitudinal stripes
<b>Listy</b>	usually 3-lobed, oval triangular, circa 9 cm
<b>Jesenné sfarbenie</b>	Oranžová, Červená
<b>Kvety</b>	pendent racemes, light yellow, May
<b>Plody</b>	single-seeded, single-winged, light green
<b>Térne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	all soils
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	5 (-28,8 do -23,4 °C)
<b>Odolnosť voči vetru</b>	good
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné vetru
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
<b>Použitie</b>	stromy do nádob, strešné záhrady, malé záhrady, dvory
<b>Tvar</b>	Vysokokmeň, Viackmeň
<b>Pôvod</b>	Northern and Central China
<b>Synonymum</b>	Acer grosseri

This Snake Bark maple forms a large multi-stemmed shrub to a small tree to a maximum height of circa 10 m. The crown is oval to round with decorative overhanging branches. The twigs usually have a slightly more greenish hue and are a little lighter than those of *A. davidii*. Therefore the stripes are less prominent. The usually 3-lobed leaves may sometimes be almost without lobes. The margin of the leaf is doubly serrated. The flowers are monoecious; female and male flowers grow on one plant. The plant has a strongly branched and compact root system. As is to be expected from a subspecies this one differs little from the species *A. davidii*. *A. davidii* subspecies *grosseri* is an ornamental plant which can be applied well in gardens and narrow streets.
