

Acer palmatum 'Inaba-shidare'

Výška	2 - 3 m
Šírka	2-3m
Koruna	wide, weeping, half-open crown, capricious growing
Kôra a vetvy	brown to grey-brown, smooth
Listy	lobes, deeply dissected, wine red, 6 - 10 cm
Jesenné sfarbenie	Oranžová, Červená
Kvety	pendent stalked panicles, purple-red, April/May
Plody	winged nut (samara)
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	well permeating humic sandy soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	Yokohama Nursery Company, Japan, 1930

A slow growing shrub with an irregular, spreading growth habit. Rarely growing into a small tree with multiple stems. The crown is wider than it is high, a spread of circa 4 m is not an exception. Mature specimens have arching branches. The leaf is palmatifid to palmatisect and the lobes are very deeply cut. The five to seven (sometimes nine) lobes are long and pointed. The colour is dark wine-red and is retained all summer. The autumn colour is deep red to orange-red. On a dry site this colouring is less intense. 'Inaba-shidare' is one of the best cultivars of this large and shape-abundant group of Japanese maples. Strongly akin to the cultivar 'Garnet'. However, 'Garnet' gets more arching branches when maturing. Prefers partial shade.
